Ref. : 2020/03/02B

Date: 22/03/2020

NOTICE

Sub.: Updated advisory for COVID-19 outbreak.

Dear Colleagues,

Our government efforts to combat novel coronavirus, which has claimed over 13671 lives globally and affected more than 3,18,000, have been praised by global agencies, including the World Health Organisation (WHO), as the country is leaving no stone unturned in fighting the COVID-19 virus.

However, the country is passing through the most crucial phase of the transmission of the disease. According to Indian Council of Medical Research (ICMR), the country is in the second stage of transmissions, i.e. local transmission. So, I request everyone of you for **complete shutdown of dental clinics across India till 31st March, 2020 or any further notification.**

The decision is taken for the sake of public health and as an abundance of caution during this serious outbreak. Please support the government and help mankind to prevent the spread of COVID-19.

Let's all fight this virus together and save humankind.

Robin Singh
