TOPIC – FIGHT CORONA (COVID 2019)

1. What is novel coronavirus?

Novel coronavirus (2019-nCoV) is a virus strain that has only spread in people since December 2019. Health experts are concerned because little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people.

2. What are the symptoms?

People who have been diagnosed with novel coronavirus have reported symptoms that may appear in as few as two days or as long as 14 days after exposure to the virus:

Fever

Cough

Difficulty breathing

4. PROTECTING YOURSELF AGAINST CORONAVIRUS

1. Avoid close contact with anyone showing symptoms of respiratory illness
2. Wear gloves, wash or change them daily
3. Wash your hands
4. Wash your towels if they have touched your hands
5. Avoid touching doorknobs and banisters

3. How does novel coronavirus spread?

Health experts are still learning the details about how this new coronavirus spreads. Other coronaviruses spread from an infected person to others through:

the air by coughing and sneezing

touching a surface with the virus on it, then touching your mouth, nose, or eyes

close personal contact, such as touching or shaking hands

5. FOLLOW STANDARD PRECAUTIONS

- WASH HANDS
- WEAR GLOVES
- WEAR MASK
- WEAR GOWN

Strict guidelines for all dentists- Follow the given precautions..& if you notice such symptoms, recommend that patient for tests.
